nbd biblion

AI-driven solution
for book search
and discovery

Bookarang is an innovative solution for collection access.
It assists readers with creative book search and discovery. And it helps librarians to sample their collection in clever ways. Because finding the right book ensures more reading enjoyment and satisfied library visitors.

1

For readers

LeesTipper

LeesTipper inspires readers. By creating a personal profile, they periodically receive tailored book recommendations from their local library collection. The Bookarang system examines the content of the books, instead of the behaviour of other readers.

The Bookarang platform
provides 3 distinct solutions, linked to your local library collection. Finding the right book has never been easier.

2

For readers

WelkBoek

WelkBoek is a powerful tool that aids readers in conducting a targeted search. With the ability to specify search parameters, readers receive tailored recommendations based on content, taking them on a thrilling journey of discovery within the pages of their own library.

3

For library employees

ThemaKiezer

The ThemaKiezer is a valuable tool that assists library employees in sharing content that follows a specific theme. With this tool, employees can craft reading tables or lists for schools, based on various themes or current events. Additionally, the 'Thema-Kiezer' simplifies the process of retrieving titles that align with local themes or the library's own programs.

API
The platform operates through an API that can be seamlessly integrated into a library website, app, or digital display.

Design
With the option of a standard front-end or your own custom design, the platform is highly versatile.
